

WHO ARE WE?

Datamotive is a series-A, institutional VC funded, software product start-up in the Hybrid Multi-Cloud Workload Portability space. The Datamotive platform and its products are built on unique, patented technologies and provides several 'industry first' features to a USD 25B+ cloud infrastructure industry.

Datamotive is targeting various enterprise infrastructure use cases including,

- Cloud Disaster Recovery
- Workload Migration and
- Ransomware Recovery

Datamotive technology is industry vertical agnostic and all major enterprise verticals like Telecom, Healthcare, FinServ, Manufacturing will be targeted to develop a strong customer demography. The goal for Datamotive is to disrupt this data protection and infrastructure resiliency market by following a customer and innovation first approach.

WHAT DO WE DO?

We're a group of entrepreneurial, hardworking, geeky-in-a-good way problem solvers. Guided by our values, we nurture a TEAM focused culture that invests in people and creates opportunities for advancement across a broad spectrum of career paths. We prioritize work-life balance and foster an environment with the space to take ownership, to be heard, and to carve a path for your individual accomplishments to help drive our success. At Datamotive, everyone has a voice, and the best argument always wins, regardless of who makes it.
